Hengst Luman India Pvt. Ltd.

The Joint Venture of two specialists in filtration will supply India's booming automotive industry with custom-made filtration solutions.

Welcome to Hengst Automotive

We are perfectionists with a tradition and passion for modern, efficient engine technology. Our company has been established for over 50 years as a development partner to the automotive industry and as a reliable supplier to the aftermarket. Our extensive and constantly updated filter range covers all current types of engines for cars, commercial vehicles as well as agricultural and construction machinery. Although many things change one thing remains the same: Our endeavor to achieve 100-percent customer satisfaction.

Anyone can supply products what we do is create solutions: Not least, this includes close personal contact with our customers based on mutual trust. We are close to the aftermarket and know its requirements down to every last detail.

Founded in 1958, we remain an independent German company managed by its third generation of family with all associated strengths: quick decision making, a high level of flexibility and 100-percent reliability.

At the same time, we possess the skills and resources expected of a series supplier to the automotive industry. With around 3,000 employees, we are active throughout the world with eleven sites in Europe, North and South America and Asia. We have enjoyed strong, above-average growth for many years and are continuing to build up our international presence.

Original Equipment Quality for Every Engine

Working on tomorrow's technology today. As a longstanding development partner and series supplier to the automotive industry, we are closely involved in concept design for future vehicle generations and enjoy the trust of all prominent manufacturers throughout the world.

Our solutions in the area of filtration and fluid management excel thanks to their high functional reliability, fitting accuracy and durability as well as their outstanding price-performance ratio. Our longstanding expertise in the original equipment sector guarantees the highest quality in the spare parts range as well with products that always correspond to the latest technical developments and which are tailored to the relevant vehicle. Precisely defined manufacturer specifications combined with extensive checks and tests vouch for this claim. Filters developed for the original equipment industry are incorporated into the aftermarket program with no change in construction.

When it comes to service, it pays to invest in spare part filters of premium quality: That means dealers and workshops can be sure of achieving the best possible filtration of air, oil or fuel. This forms the basis for optimum engine performance, a long service life and reliable operation.

Fluid management module for passenger cars of General Motors

Numerous certifications reflect the high quality standards behind the phrase made by Hengst:

ISO 9001: Internationally valid management system for assuring the quality and increasing customer satisfaction. **ISO/TS 16949:** Quality management in the automotive industry, containing ISO 9001 as well as additional and stricter requirements. **ISO 14001:** Internationally valid management system, with which environmental consequences are avoided or reduced and environmental protection is improved on a voluntary basis.
